

Framework and support mechanisms for building renovation in France

Philippe Pelletier, Sustainable Building Plan's
President

30th June 2020

Priorities for building renovation

- French building sector:
 - 43% of final energy consumption
 - 25% of greenhouse gas emissions

- Renovation goals:
 - Carbon-neutral building stock by 2050
 - All buildings renovated at a high performance level (= BBC renovation) by 2050

- 2 priorities:
 - Reduction of energy poverty
 - Focus on non-residential buildings (schools, hospitals, etc.)

French framework and support mechanisms for building renovation

- Progressive approach: from incitation towards obligation
- Complementarity between the national and the local level
- Importance of communication and support programmes for households
- Support mechanisms to finance renovation:
 - Increase the role of CEE (white certificates)
 - Increase public subsidies for low-income households
 - Interest-free loans
